

The Research Data Management Tool Landscape in North-Rhine-Westphalia  
A Survey by the RDM Workgroup @ HPC.NRW

The Competence Network #HPC.NRW  
An association of NRW wide HPC-sites

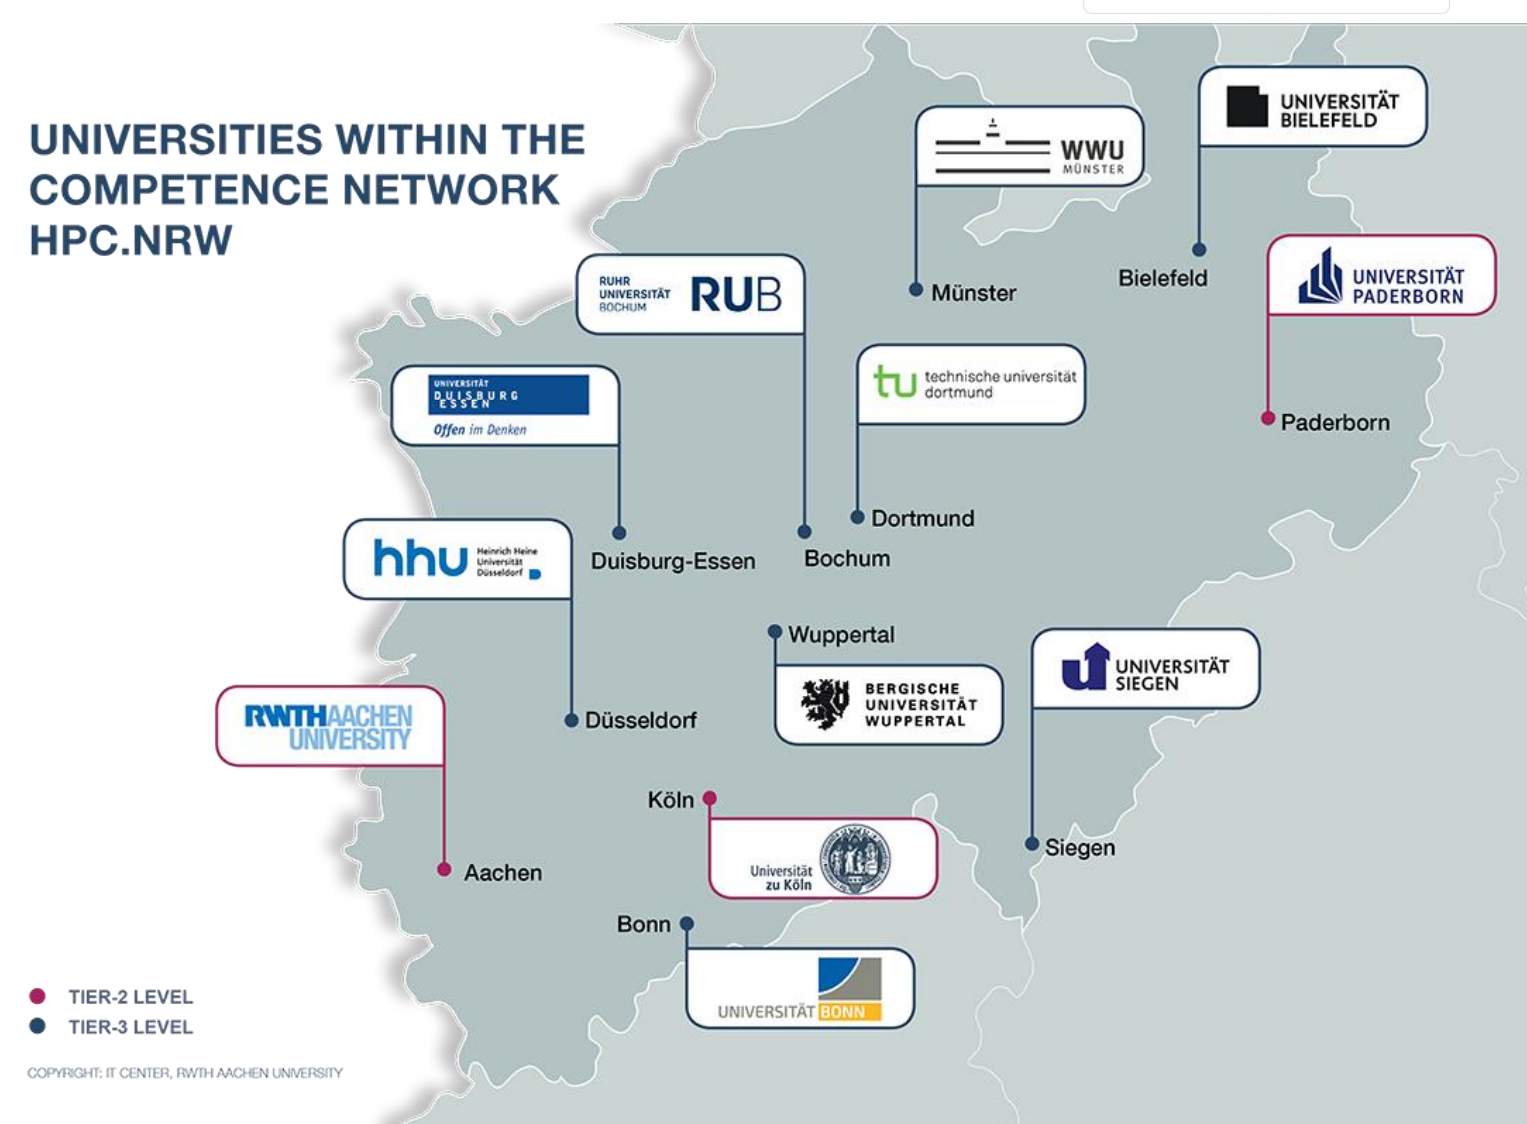

The North Rhine-Westphalian Competence Network for High Performance Computing (HPC.NRW) is a competent and thematically broad contact point for users of High Performance Computing (HPC) systems in NRW.

HPC.NRW supports researchers, administrators and institutes in the field of high-performance computing. The competence network creates the personnel and organisational prerequisites for combining the expertise of the large HPC centres (so-called Level 2, or Tier 2) with the consulting services of smaller centres (Level 3, or Tier 3).

The competence network provides basic services for locations without level 3 centres and universities of applied sciences. For level 2 centres, a uniform, structured access for HPC users at all universities in NRW has been established.

This promotes research and supports scientists. We are happy to [help researchers](#), [administrators](#) and [institutes](#) by providing an overview of access options and advice on the efficient use of HPC resources.

RDM Team@HPC.NRW  
Communicate RDM Topics

The workgroup for RDM within HPC.NRW communicates HPC-relevant RDM topics and operates as an “interface” between HPC users, RDM developers, local RDM teams and national RDM associations. We organise a monthly seminar with topics generated through the interest of the participants.
